

# Intelligent Transformation Platform

Setting the new standard in Data Capture Solutions

# Getting connected

Enable your Business to the Next Level

Our IT-Platform is designed with a mediation architecture in mind. Current sources are SAP, Oracle SalesForce, ServiceNow and others. Take use on Azure, Amazon Drive, Google and what's more to come? Changing demands and IT possibilities ask for a future proof solution. That's what we present to the market today, welcome to innovation!

# Unlock processing power

Data Capture and Data Analyse in one suite

Let's start with preprocessing, that's what we do for more than twenty years. Today's demands are beyond the scope of the traditional archive, we go Mobile. Data recognition on images taken with your phone, that's our actual demand. We Capture Data the traditional way, but beyond that we Capture the Internet! Our innovative tooling brings you smart Excel files, or port data into any application.

# Control at your fingertips

Data Capture and Data Analyse in one suite

Data processing will be manageable with tailored cockpits, keep focus on Data! No swapping into different modules or windows, we keep your navigation simple. Our collaborative approach gives users freedom and Data integrity the same time. Logging on all handling is performed inside the intelligent productive environment. An ideal IT-Platform for BPM solutions that demands professional Data handling.

Operational  
Excellence

Business  
Transformation

# Machine Learning

Intelligent Digital Transformation

Start using power tools that boost your business decision-making processes!

The definition of Machine Learning today is not like machine learning in the past.

When today ML models are exposed to new data, they are autonome able to adapt.

Think about your possibilities when you start using techniques actually on the market.

Proven technology in processes and being used with specific business objectives in mind.

## Affordable

Only pay for what you use

Many techniques can be implemented, also the good old OCR technology, run into the cloud or on premises.

The latest developments on ICR are smart technologies giving impressive results on handwritten recognition.

Before getting into good results, Image Pre-processing can be a factor of importance, we foresee this needs.

After recognition Data handling as Classification, Verification or Export Formatting modules come insight.

We take care of these steps inside our platform, new and somewhat older techniques, just pay for usage.

### Gamechanging Technology

Design of our platform is build on 21 years Data Capture experience. Being ahead of our competitors, we designed a complete new system. Based on entity recognition, Machine Learning and artificial intelligence.

### Territory of Connecting Intelligence

Today's systems are Cloud based services and on premise applications. The architecture of our Technology Mediation is based on this landscape. Our Innovative technologies connect legacy systems to modern algorithms.

### Future proof navigation beyond current IT horizon

The age of actual machine learning and big data algorithms is just started. We see the definition of technology and features as a constant process. That's where we are, on the Technology cutting edge to bring you results!

# Getting to work

The Platform efficiency is convincing

We don't change your system, just showing that conversion of your current working procedure will be improved. Our installation is free of charge, we know that our platform modules are simple implementable and convincing. After successful implementation on our Cloud with a practical working environment, you can decide what's next.

The more challenges we get,  
the more passionate we are.

## Involvement

Our commitment to you

The EasyData Intelligent Transformation Platform is the logical step for organizations to become more effective. Gain efficiency by reducing boring work, think on respond to standard emails while focused on important tasks. Use your talents and effectiveness on where it really counts for your organization, leave routine to automation. That's our work, we maximize your IT investments, we are ambitious to maintain and develop smarter solutions. With EasyData's IT-Platform involved you are guaranteed of a long-term, well-orchestrated solution at your side!
